

Practise Assignment - MongoDB CRUD -1

You are developing a **Student Management System** for a training institute. All data is stored in a MongoDB database called **instituteDB**

Collection - students

Fields

- name
- email
- course
- feesPaid
- joiningDate

Problem List

1. Insert a student named **Prabhakarna Sripalawardhana Atapattu Jayasuriya Laxmansriramkrishna Shivavenkata Rajasekara Srinivasana Trichipalli Yekya Parampeel Parambatur Chinnaswami Muthuswami Venugopal Iyer (Or just Venugopal)**, who joined the **Java Full Stack** course and paid ₹30,000.
2. Insert **three students at once** with the following details

Name	Course	Fees
Superman	Python	20000
Spiderman	PHP	18000
Batman	Java	25000

3. Insert a student **Gabbar Singh** who is enrolled in the subjects(Array)

- CSS
- JavaScript
- MongoDB

4. Store Address Details (Embedded Document)

Insert a student **Anthony Gonsalves** with the following address:

- Location : Roop Mahal
- Street: Prem Gali
- House No: Kholi No 420

5. Retrieve all documents from the students collection.

6. Retrieve all students whose course is **Java**.
